

International Digital Job Fair

AI-based job matching & live-event

In this very challenging time, IBM aims to support job seekers with the new social initiative called [SkillsBuild Reignite](#). In addition to offering free access to skills and knowledge, together with our SkillsBuild partners we are hosting an international digital job fair to bring together job seekers looking for IT entry-level opportunities with employers who offer internships, traineeships, apprenticeships or permanent jobs.

Find entry-level IT-openings

Our job providers have openings in: *Cybersecurity, Software Development, Data Analysis, Linux System Administration.*

They offer local, international and remote job positions.

Register your profile

Register your skills, projects and experiences to receive preselected job openings matching your profile.

Apply for the best matching jobs

Detailed tailored job openings will be available to you. Decide which job you want to apply for.

Practice your interview and get it scheduled

The virtual live event offers room for practicing interviews, as well as interview rooms with your selected employers.

Meet more employers

Employers will present themselves during the virtual live-event with their company culture, projects they are working on and employee benefits. Join the sessions you are most interested in.

Stay connected with your potential employers

The AI-based platform will keep you up-to-date about the progress of your hiring for 60 days.
